Search Space
Infinite set of all possible transformations within transformation language ETL

Search Space defined by simplified MOF

Search Space reachable by <u>manual refinement</u>

Search Space reachable by transformation <u>pattern</u>

C_1

Creation of additional pattern

Solutions of a given scenario

A_1

A_2

B_1

Manual refinement

B_2

C_2

D

100% Fitness

Simplified MOF → extensible

Extensible through defined design method

Defined based on a complexity graduation → Blueprint for further scenarios

Enabled through maintainable results
